market, that metal having touched the lowest point since in the early 70's. Its close on the New York board was \$3.65, close on the New York board was \$3.65, a slump of 10 cents, with the market weak and tending downwards. To say that this was a surprise is putting it mildly, for the mine owners and operators were astounded. The intensely par-tisan attributed the fall to the tarist act, but the more conservative saw in it the result of the workings of the lead

was blown in yesterialy afternoon. This gives the smelers in the valley six stacks, each of the companier having two in operation.

The gold properties have been lacking in shipments during the week, it being between seasons, as it were, with them. The Mercur clean up has just been finished but no returns have been received at the office of the company in this city. President Dern is now inclined to the belief that the product for the last haif of the month will not be as heavy as for the first two weeks, it having developed that the highest grade ore was not treated. For some weeks the Stewart in Bligham, has been in operation, but no shigments have yet been made. It is expected that within the next week or two a clean up will be made and the product sent to the mint. The Gold Hill mines of the Cane Sprims Consolidated Mining and Milling company sent in their usual bars, and several other producers of the yellow metal are booked for shipments this week. The West Mountain Placer mining company has been experiencing more delays on account of the slowness of the contractors, but the gentlemen at the head of the enterprise now feel confident that the property will soon be producing places and the latter fifteen bars, 18,500 fine ounces, and the work in ot sooner. The ground the workings of the mine, and Supering at the face continues soft, but fair property sill soon be producing places is being made, severty feet being made during the week. As the tunnel and the workings of the mine, and Supering at the face continues soft, but fair propers is being made, severty feet being made during the week. As the tunnel and the workings of the mine, and Supering at the face continues soft, but fair propers is being made, severty feet being made during the week. As the tunnel and the workings of the mine, and Supering made during the week. As the tunnel and the strokes of the Corn

the lead mill at Bingham yesterday afternoon and the ore will be treated within the next three or four days. This test is being made for the purpose of determining just what character of mill the company should put up. General Manager Beck is back from the mine and reports everything in splendid shape. The output is over sixty tons daily.

On account of the heavy expenditures necessary in the enlargement of its shaft the Silver King will not pay its usual monthly dividends for August and September, but will pass the regular periods until November first. It is expected that the third compartment will be in place by the list of the coming month and then the taking out of the ore will be resumed. The stock of the Silver King has suddenly become very popular and those who are lucky enough to be represented upon the stock books of the company are not searching for buyers. The price of the stock is ranging between 312 and 314, with none in the market, for the company is paying \$37,500 to its stockholders monthly. Broker Davis reports an increased activity in all of the first class stocks. During the week he unloaded several good sized blocks, among them one of Ontario at \$10.

LIKE THE DOG IN THE MANGER. Both Buyers and Sellers of Stocks

"The stock market opened this week with an upward movement," said James A. Pollock yesterday afternoon, "based in the main on the anticipated demand of buyers, but this being purely supposi of buyers, but this being purely supposi-tionary and a matter of sentiment and not created by actual transactions, the general market sagged off during the lat-ter part of the week and reflected a good deal of disappointment on the part of sellers seeking higher prices. In short, I may say, that while this week showed an appreciable improvement over last, it has not proven equal to expectations. There has been some lively trading, but it has been mainly among professional dealers.

. The Fight in Illinois. Salt Lake City, Sept. 8. To the Editor of The Herald:

The contest for United States senator in the state of Illinois should possess more than a usual amount of interest to the citizens of Utah. The Republican seeking nomination is Cullom-he of Cul-lom bill fame. What lover of Utah and lom bill fame. What lover of Utah and her people does not recall the legislation of which he was the father, and which came so near being enacted into law? The Democrate have nominated Franking McVeagh; the Chicago merchant, head of a great grocery house known all over the west, and in Utah especially. Mr. McVeagh's nomination for the place of senator shows conclusively the trend of Democratic thought on the great question of having the United States senators elected directly by the people, and that action alone—which the Republicans did not dare to follow—should win for them the election. McVeagh's speech amouncing why he left the Republicans did not dare to follow—should win for them the election. McVeagh's speech amouncing why he left the Republican party and became a Democrat. and proclaiming became a Democrat. and proclaiming obstitute be printed in favor of the free coinage of silver, is one of the most admirable public utterances heard for years and ought to be printed in full by The Herald and scattered broadcast everywhere.

Mrs. J. C. McNally will be the soloist at the First Congregational church this morning.
